The New Shopper Journey

HELP ME DISCOVER IT

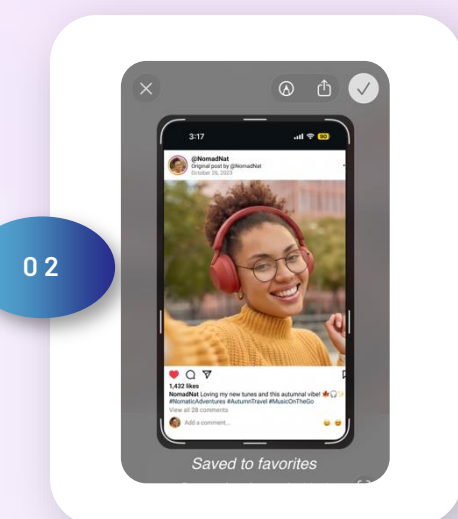

User asks an LLM

Receives products in AI answers with verified specs and reviews

► AEO + Data Enrichment

01

02

Spots it on Social

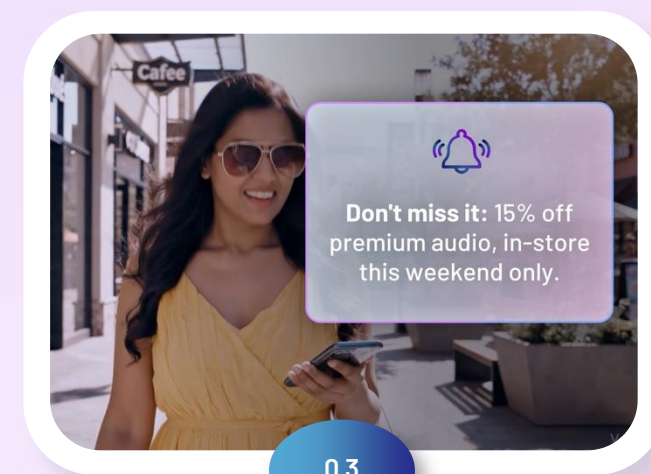

Sees an influencer wearing item; screenshots the post to search later

► Brand Activation

Gets a Geo-Triggered Offer

Walks past store and automatically receives offer based on location

► Geolocation

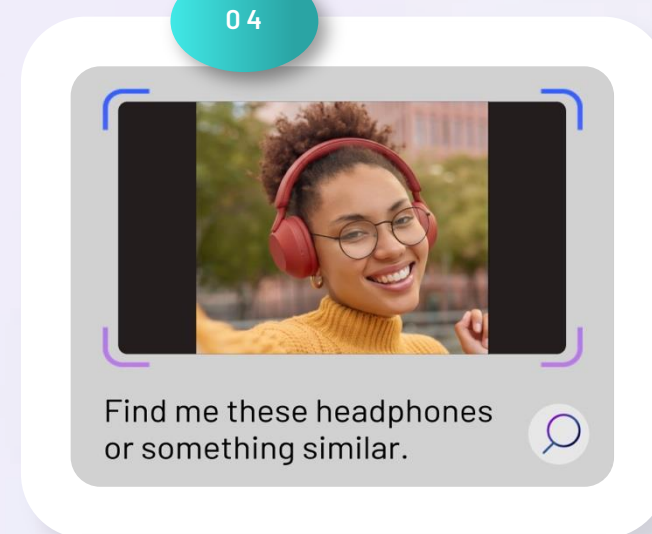

03

Searches by Image

Uploads image, which allows for a more specific, targeted search

► Multimodal Search

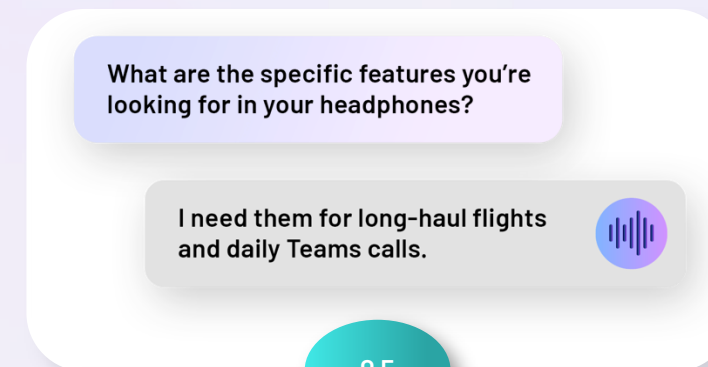

04

Tells It What She Needs

Prompts with specific intent to help reshape search results

► Intent-Based Recommendations

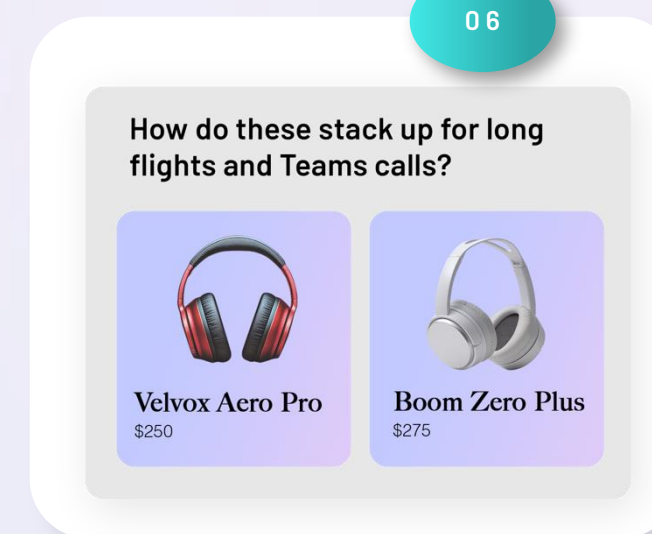

05

Asks & Compares

Inputs question to determine best fit and receives side-by-side comparison

► Conversational Selling

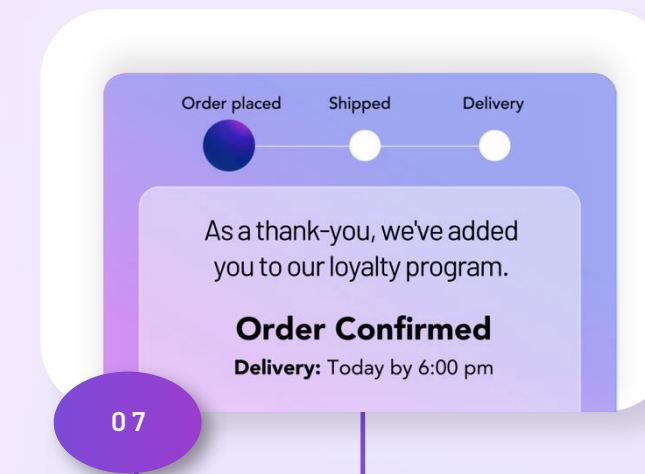

06

HELP ME BUY IT (& REPEAT)

Buys & Joins Loyalty

Experiences seamless checkout; enrolls in rewards automatically

► Agentic Checkout + Loyalty

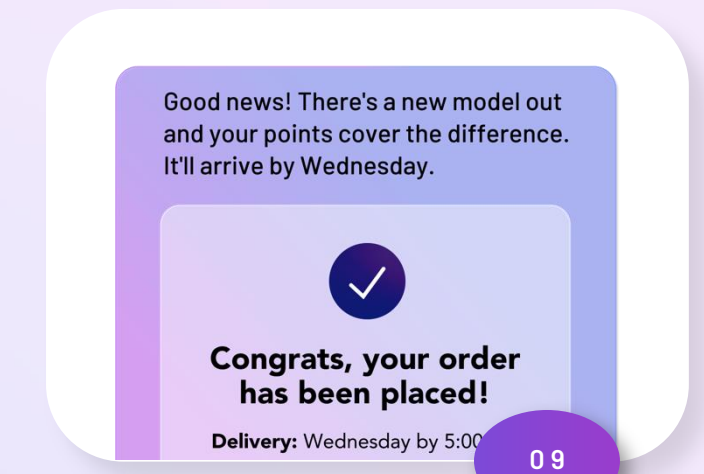

07

Upgrades with Points

Trades up to newest model; points cover the difference, agent handles full order

► Loyalty & Re-Engagement

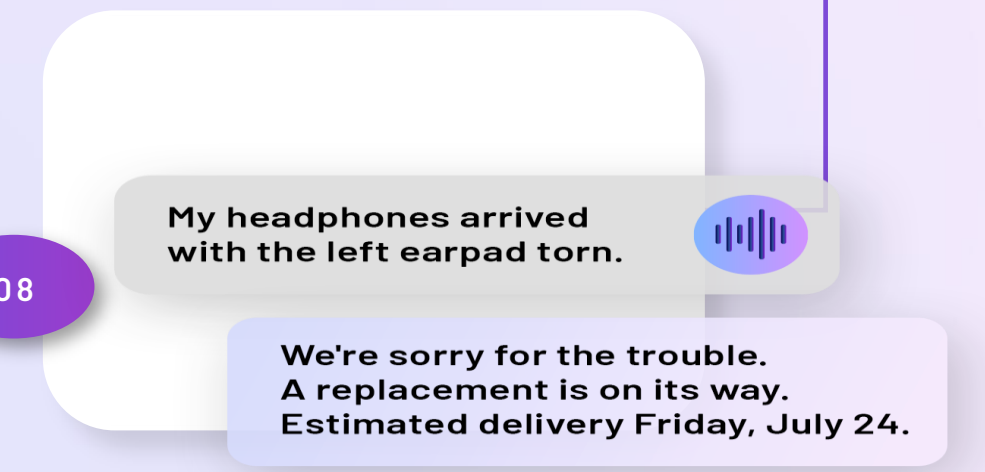

09

Resolves an Issue

Benefits from interactions in conversation, no ticket queue

► Customer Service

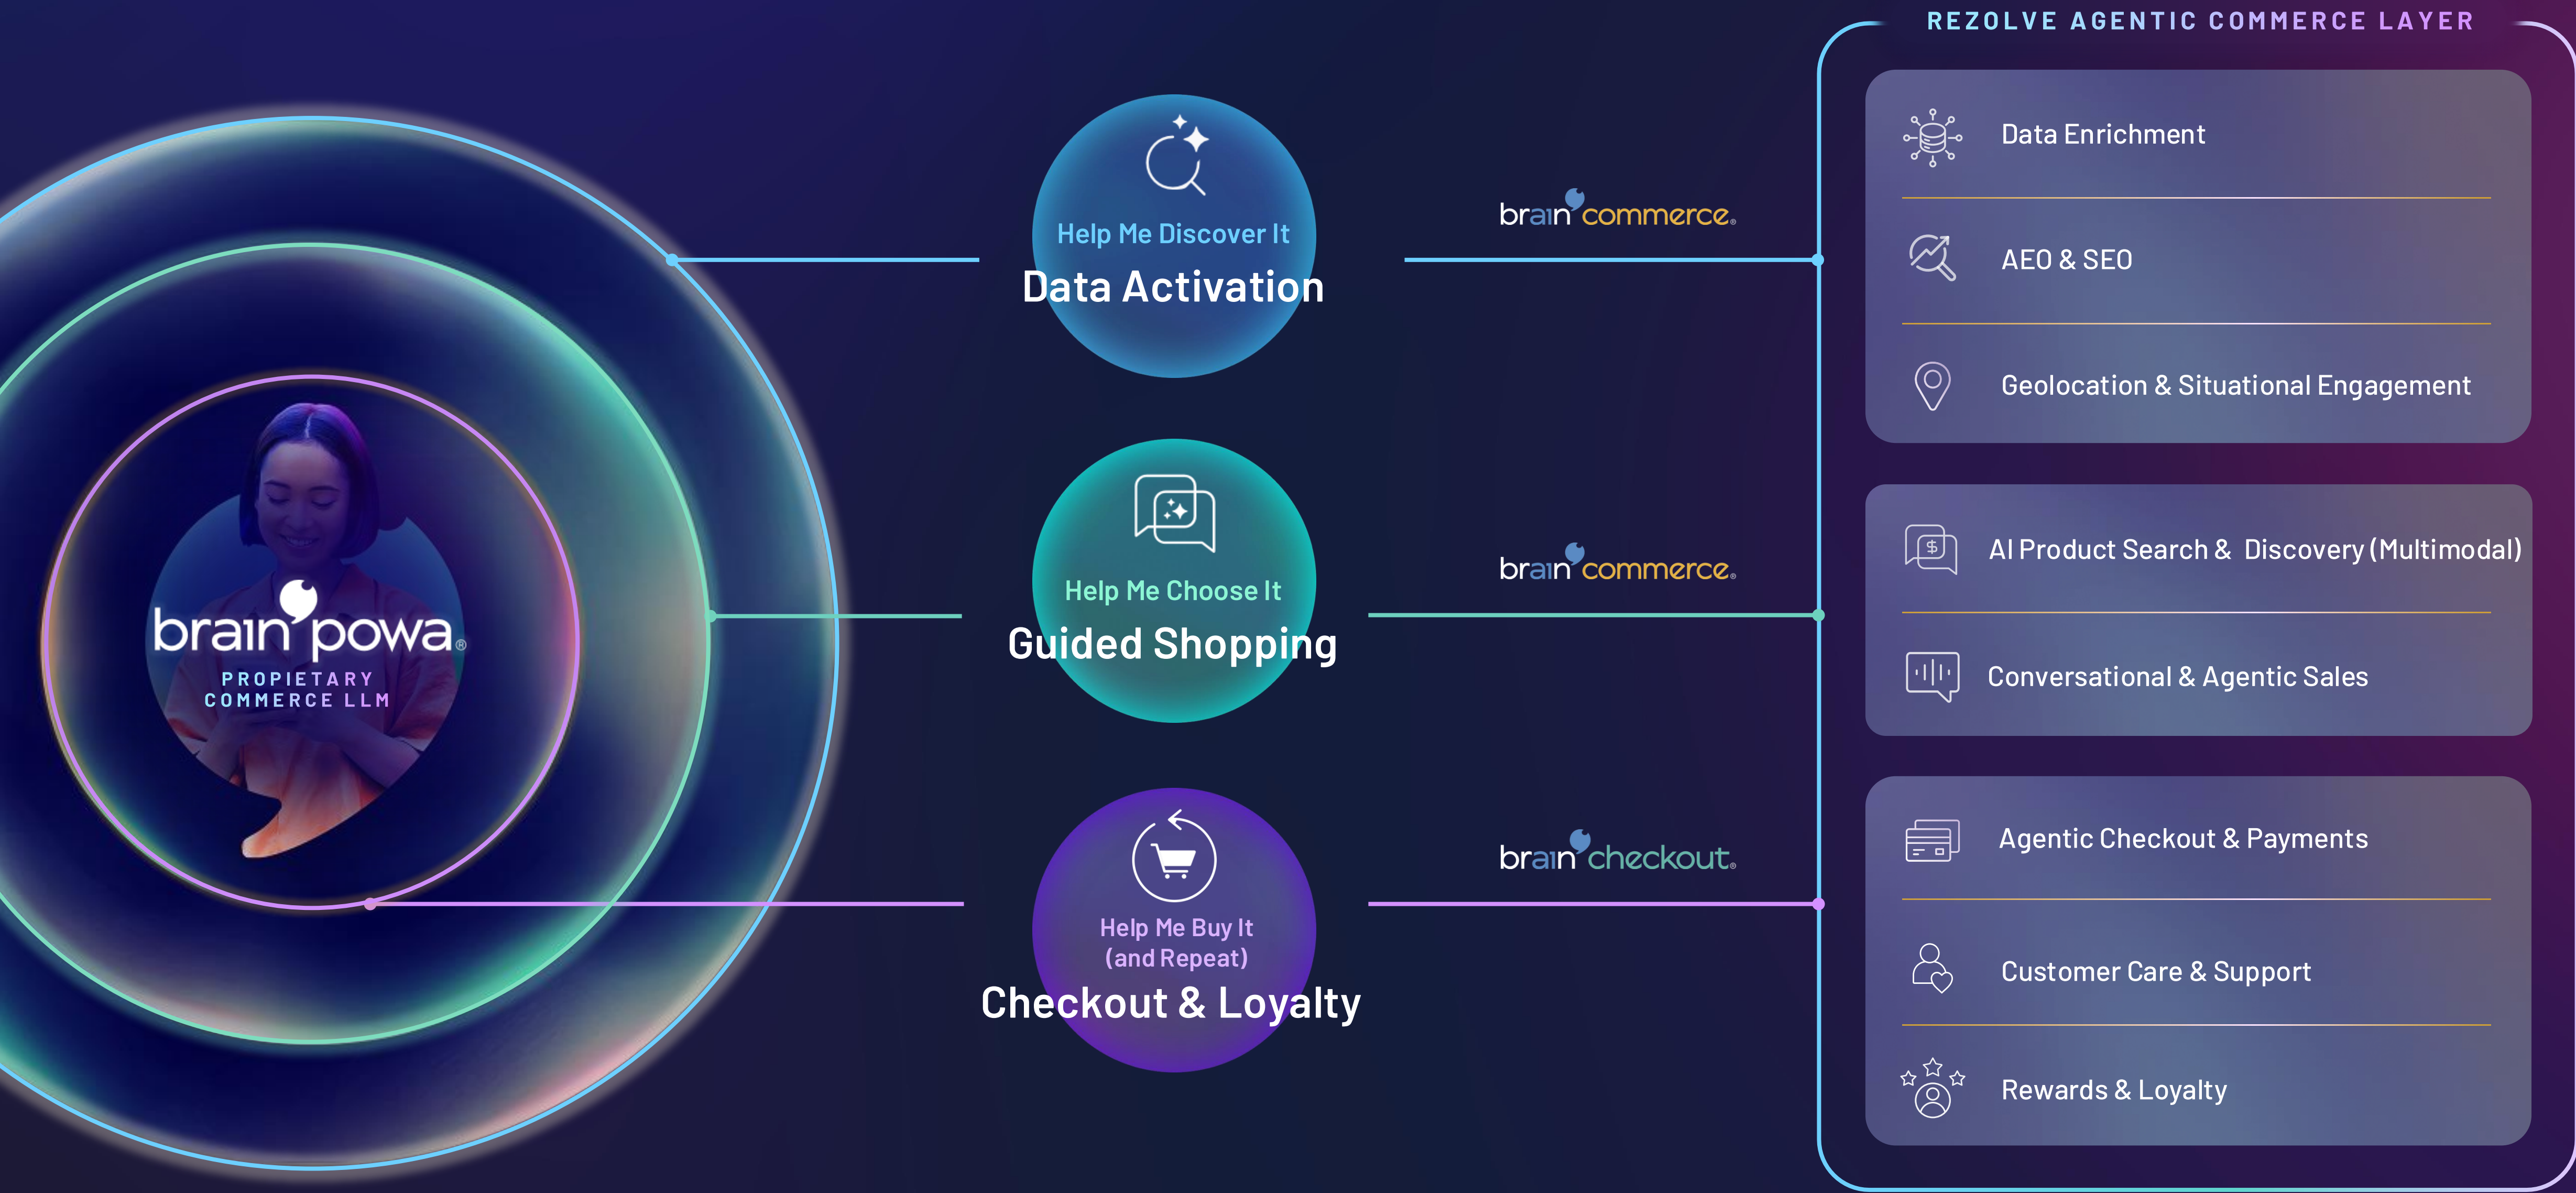

08

DO IT FOR ME

The agent does everything, from discovery to decision-making and purchase

Q1 2026 Avg

39%

Consumers Using AI to Shop

Source: Adobe Analytics (Q1 2026) · retailgentic.com

+393% YoY

Q1 2026 - growth sustained well beyond beyond the holiday season, confirms a trend.

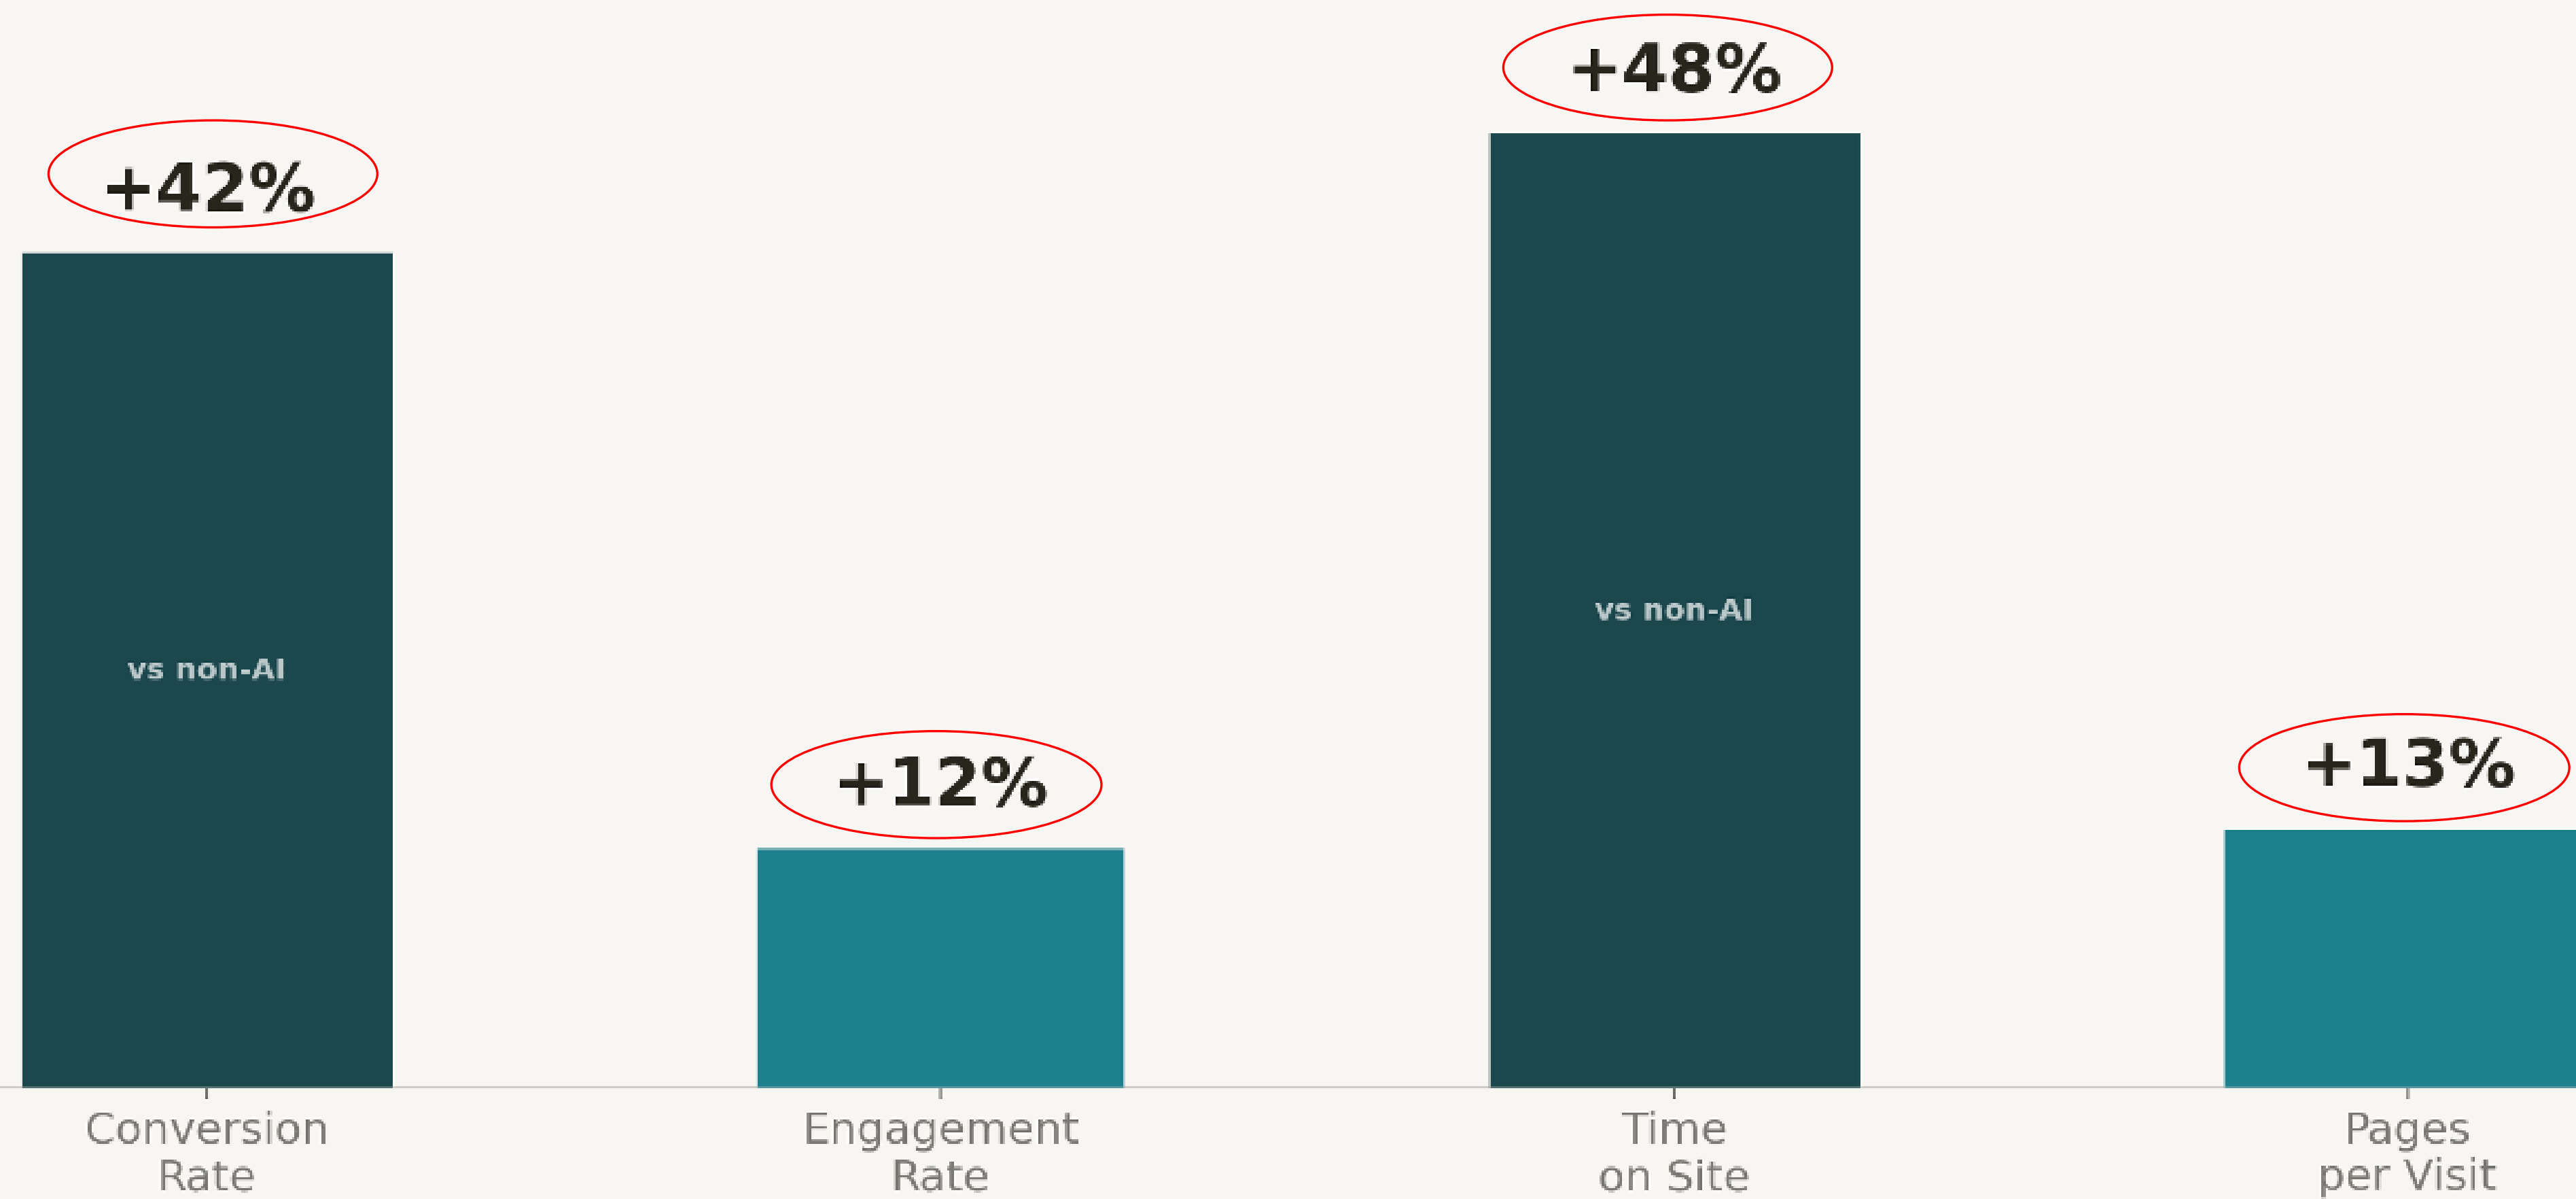

39%

~ 4 in 10 online shoppers using AI to shop a part of their journey

- Compressed search, answers, qualifications before click
- Signals are durable and statistically significant
- Leading brands moved beyond experimental

Adobe's U.S. retail dataset — covering over **1 trillion visits** — points to a structural shift, not a one-season spike.

AI-Referred Shoppers Outperform Across Every Metric (March 2026, U.S. Retail)

AI-DRIVEN VISIT SHARE RECORD HIGH

Persistent spring demand—not a holiday-only spike

Source: Adobe Digital Insights, May 2026

+138% YoY

Retail AI-driven visit-share growth in May 2026; a new record high.

39%

Used AI assistants for online shopping; 85% of users say AI improved the experience.

- May reached the highest AI visit share since tracking began
- Spring strength moved beyond the holiday spike
- AI is now an upstream discovery and new publisher surface
- May 2026: 19 large US retailers (Walmart, Etsy, Ebay, Target, BestBuy, HomeDepot, Wayfair etc) reported 53% more visit (source: Reuters)
- China: Qwen (100M MAUs, 200M AI orders Feb), Doubao, and JD' s assistants are being connected directly to live payment, fulfilment and after-sales execution.
- SEA: Shopee in ChatGPT (Aug 26)

OVER TO YOU

Design and build a solution that helps brands create, optimize, or evaluate product content so that it can be effectively understood, selected, and recommended by AI-powered shopping assistants and conversational agents.

- What information does an AI agent need to confidently recommend a product?
- How should brands describe products beyond traditional titles and specifications?
- How can product attributes, customer personas, use cases, comparisons, and storytelling be represented in ways that AI systems can reason over?
- How can brands measure whether their content is "AI-ready"?
- Can generative AI be used to automatically transform existing product catalogs into agent-optimized content?

*Thank
you!*

Good Luck!
